

Automatic Fire Extinguisher Ball

Don't Panic, Here's Automatic Fire Extinguisher

"Redmatic Automatic Fire Fighter (Extinguisher)" is a new revolutionary product which extinguishes fires, when in direct contact with flames. Install near fire-prone areas or throw it into a live fire and it will act automatically within 10 - 15 seconds.

Advantages

Redmatic is an important technological breakthrough soon to become a reference on the firefighting products market. It is enforced by a series of striving advantages that make the product stand out by itself:

Easy to Use

The drum-shaped has no pins, no moving or mechanical parts. It doesn't require any training due to its simple use cases.

Compact & Lightweight

The drum-shaped weighs only 1.5 kg, which is why this device is so compact and easy to store or transport.

Self-activating

It self detonates in case of fire situation even in absence of people.

Attention grabber

When Redmatic is deployed, the noise created ranges between 120-140 dBA and thus draws the attention of anyone up to 200 meters.

Environmental friendly

It does not pollute the environment.

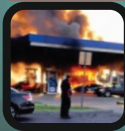

And many more continues...

Applications & Uses

KITCHEN

GAS STATION

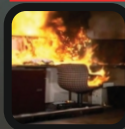

LIVING AREA

TRAINS

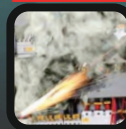

OFFICE / SHOP

VEHICLES
